

More gripping flexibility – New gripper jaws

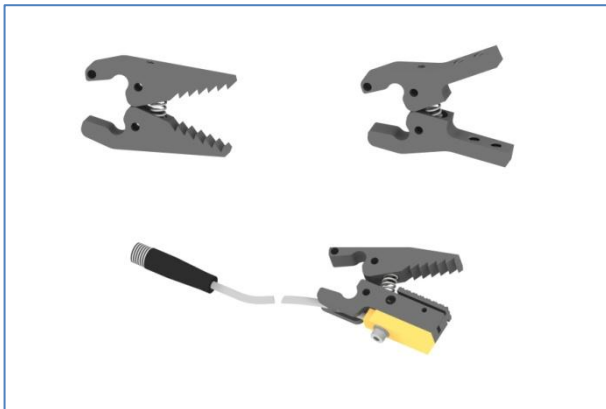

New gripper jaws for GRZ 14 and GRZ 20 model range

5 At the K Trade Fair 2013, ASS Maschinenbau GmbH presents new jaws for the GRZ 14 and GRZ 20 grippers.

For the GRZ 14 model, ASS added three new gripper jaws to the ASS Robot Hand Kit (EOAT): GRZ 14 Jaws S with saw jaws, CS with saw, sensor with plug, and a version A for adapting custom-made jaws.

10 For the GRZ 20 model the PU Jaws with polyurethane pads for non-marking gripping are now available.

All new gripper jaws are made of hard-coated aluminium. The jaws are easy and fast to install.
